Hi Brian –

It seems that the Drug Analysis Laboratory here at the HSLI is having problems purchasing illicit drug standards that they require for their analyses. Do you have any reservations on including a few more vendors on HSP29 (it's next incarnation) for this purpose? They use Sigma-Aldrich, Alltech and USP for these purposes, although they lost access to Sigma when it was dropped from HSP13(29) and Sigma declined to apply as a vendor on RFR Lab 2006...

Jill

Hi Jill

At the next PMT meeting please mention that the Drug Lab is currently confined to buying controlled substances, specifically DEA scheduled 1 and 2 drugs, from only USP and alltech via Lab 2006. Sigma did not want to become part of Lab 2006. If these two vendors do not sell a product that we need, Government Scientific and Cardinal Health are not able to buy DEA Scheduled 1 and 2 drugs for us. (Cardinal Health appears to only have a license for class 2 drugs and lower that have medical uses.)

Thanks  
Peter
